Working at : Worked at creating a whole new working pipeline of the category of the portal issues increased the accuracy of the system by 5-10% ,Error Fixing in the processing of the tickets, Calculated the whole runtime of the processing of single ticket made changes to db for it, also made updates to the error table and working of it separated messages and the stacktrace messages

Project : CRM Automation

1. Hours worked during the period of report:

Total hours worked under the project **126 hours**.

2. Duties during the period of report:

During this period, my primary duty was to **find the root cause of the runtime errors and then fix the errors completely, fix the presentation of the messages in the analytics, creating a whole new pipeline for the portal issues.**

- Had to look at all the processing of the tickets and then find the issues in them
- Learned about Salesforce, elastic apm , Grafana, Kafka

3. New tasks planned during the period of report:

- I plan to shift some synchronous tasks to coroutine tasks.
- Make the permanent flow for the portal issues.
- Making the codebase bug free.
- Finding the runtime all errors.
- Making the errors and analytics presentable.
- I plan to migrate the db flush calls at the end at of the workflow to reduce the times taken for the db call, which may slow down the process.

4. Network contacts established during the period of report:

Network connections established with Kalfka prodigies and Elastic apm guys.

5. Personal insights during the period of report:

- Learned elastic apm.
- Learned apache kalfka integration on concurrent pods.
- Making the Pipeline process of Portal Issues.
