Working at : Making a new intent flow for preauth clarification deduction that is required to check the approved preauth if not find the preauth in the vings data for the 7 days query expectation and then summarize the deduction remarks and then reply the customer with the template and the approval letter, Also worked for the Making NER as a different service in the system so that it is independent of the flow.

Project : CRM Automation

1. Hours worked during the period of report: Total hours
worked under the project **115 hours**.

2. Duties during the period of report:

During this period, my primary duty was Making the of the preauth carefully and check for the approved only data and also that lies in the 7 day filter.

Making NER as a different service was also a challenge as it was deeply embedded in each intent and was called separately for each of them.

3. New tasks planned during the period of report:

Making new intent and different service.

4. Network contacts established during the period of report:

Network connections established with CTO and business head understood the business more to fill in the more impactful changes to the code and the pipelines.
